Allowable Subject Matter

1. Claims 1-7, 11-21, 28-34, and 38-55 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Applicant's claimed invention is deemed allowable over the prior art as the Examiner is persuaded by Applicant's arguments regarding the newly amended claim language.

The Examiner maintains that the previous rejection relied on the closest relevant art to the instant application. Applicant has amended the claims to provide the distinction that **each** capacitor is balanced in two voltage ranges that are separate from each other.

The Examiner believes that the reference does not anticipate this specific claim language and does not find any fair motivation to modify his previous interpretation of the reference, or any new interpretation of the reference, to arrive at this specific claim language.

An updated search has not provided any new grounds of rejection or any interfering subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
